

Invitation

We cordially invite you to the 27th International Conference on Photochemistry (ICP 2015), which is to be held in Jeju Island, Korea, from June 28 to July 3, 2015.

Started in 1962, ICP is one of the oldest and most established international conferences in the field of Photochemistry. It provides photochemists and scientists in related fields a major forum to discuss their latest developments in fundamental and applied photochemistry and related sciences.

We are certain that ICP2015 will provide a variety of stimulating lectures and presentations which will inspire the attendees, particularly the young scientists who are entering into this exciting field of photochemistry.

We look forward to welcoming you at the beautiful island, Jeju, Korea.

Your sincerely,

Welcome to Jeju island, Nature's Paradise in the north Pacific!

Jeju is proud of its unique cultural folk heritage as well as its geographical and historical relevance. The island itself is an extinct volcano with its peak jutting skyward at the center and a broad, gentle littoral all the way around, a very unique geographical condition. There are bountiful forests and ravines, fantastic rock formations and volcanic craters, and caves and grasslands that together paint a natural scene of breathtaking beauty. Sparkling seas and tiny islets surround Jeju, with jutting rocks set amidst sandy beaches to create a magnificent view virtually everywhere you look.
